Course Overview

Environmental Awareness & Sustainability Course

The **Environmental Awareness and Sustainability Course** by the National Certification Bureau (NCB) – HSE Training & Consultancy, Kuwait, helps learners understand environmental protection, sustainability, pollution prevention, waste management and workplace environmental responsibilities. It is suitable for employees, supervisors, managers, HSE professionals and organisations that wish to improve environmental awareness and embed sustainable workplace practices.

LEARNING OBJECTIVES

By the end of this course, learners will be able to:

- Understand environmental awareness and sustainability.
- Identify common workplace environmental issues.
- Explain the importance of sustainable development.
- Recognise workplace activities that affect the environment.
- Understand basic Environmental Management System (EMS) principles.
- Identify sources of air, water, land and noise pollution.
- Apply practical waste management methods.
- Understand environmental emergency response procedures.

WHO SHOULD ATTEND?

- ✓ HSE officers
- ✓ Safety officers
- ✓ Environmental officers
- ✓ Supervisors and managers
- ✓ Engineers
- ✓ Facility management staff
- ✓ Construction workers
- ✓ Oil and gas employees
- ✓ Manufacturing workers
- ✓ Any employee involved in environmental responsibilities
